

PRODUCT INFORMATION

Heavy Duty Tile Cleaner

Premium Grade Residue Remover

A powerful and hard wearing cleaner designed to take the effort out of clearing stubborn soiling. Ideal for when a more robust clean is needed or for when grout, cement or limescale is present on newly laid tiles. Our Heavy Duty Tile Cleaner also doubles up as a handy preparation treatment to deep clean before polishing.

Dilution: For glazed tiles a solution of 1:10 parts of warm water is recommended. For quarry and terracotta tiles, brick or natural stone or slate use 1:4 parts of warm water. If area to be cleaned is severely soiled, undiluted solution may be required.

1. Always try the solution on an inconspicuous area before application. Do not use Heavy Duty Tile Cleaner on marble tiles or tiles containing limestone as this will result in discolouration of the tile and a loss of the glossy finish. If you are unsure of the contact time, get in touch with your supplier.
2. Apply the solution to the area of the floor to be cleaned and leave in contact for 15 minutes. If left in contact for longer than 15 minutes the tile will become more difficult to scrub.
3. Scrub the area thoroughly where the solution has been applied using a brush or scouring pad.
4. Rinse the floor 3 or 4 times with clean water ensuring that all the solution has been removed. Failure to adhere to these guidelines may result in damage to the tiles.
