

PRODUCT INFORMATION

Tile & Stone Colour Enhancer

Premium Grade Colour Enhancer

Brighten up your tiled surfaces with our Tile & Stone Colour Enhancer! This finishing product boosts the natural appearance and texture of tiles to deliver a more vivid look and additionally provides serious protection against oil and water based stains.

Coverage: 8-10m² per litre
Minimum application temperature 10°C

Penetrates the surface of stone and tiles to enhance the natural colour and texture. Ideal for use in kitchens, washrooms and commercial environments where a more vivid appearance is necessary.

1. Ensure the surface to be treated is clean. Remove cement and grout stains from new tiles prior to treatment. Deep clean older tiles, removing layers of wax.
2. After cleaning, allow enough time for the surface to dry prior to using Tile and Stone Colour Enhancer.
3. Using a dry, lint free cloth, apply an even layer of even of Tile and Stone Colour Enhancer as evenly as possible to the surface to be treated.
4. Remove any excess immediately to prevent an uneven finish with a clean damp cloth.
5. After approximately 4 hours the surface can be used as normal.
5. Repeat the process for a deeper colour.
