

PRODUCT INFORMATION

AR-950

Heavy Duty Water Based Ink Cleaner

AR-950 is an aqueous solution of non-ionic surface active agents, hydrotopes and alkaline builders. It is designed for the general cleaning and the removal of ink deposits from within the cell structure of Anilox rollers.

Spray or wipe on to surface to be cleaned. Leave for a few minutes and rub off with a cloth. Alternatively AR-950 may be used in ultrasonic systems or immersion tanks.

Concentrated - AR-950 can be diluted according to individual requirements.
Powerful - heavy duty formulation swiftly emulsifies wet and dried water based inks.
Effective - can be used in both hard and soft water areas.
Versatile - ideal for use in ultrasonic systems and immersion tanks.
Easy application - can be used by either the spray, brush or wipe methods of cleaning.
AR-950 is classed as "IRRITANT" under the Chemicals (Hazard Information and Packaging) Regulations, which reduces the requirement for heavy duty P.P.E.

The logo for Melpass, featuring a stylized red 'M' followed by the word 'elpass' in blue lowercase letters.
