

PRODUCT INFORMATION

JH-101

Heavy Duty Ink Remover

JH-101 is formulated to remove a wider range of inks including acrylic, PVB, two pack inks, enhanced pigment process inks, water based inks formulated to print on film and plastic, along with coatings and lacquers. It will clean Anilox and rubber rollers in situ, saving production down time. This versatile product can be used in standard tanks, and can also be applied by spray, brush or applicators.

JH-101 can be applied by brush, mop or spray, etc. Alternatively it is recommended for use in immersion cleaning applications.

Safe - effective replacement for Acetone and Ethyl Acetate.

Non corrosive – safe on a wide range of surfaces.

JH-101 is water emulsifiable – flushing with water ensures the complete removal of the cleaner and the inks.

A complex blend which is suitable for cleaning a wide range of inks and lacquers.

JH-101 is versatile and can be used with water based and solvent based inks.
