

# PRODUCT INFORMATION

## Cell Gel

### Solvent Based Printing Ink Remover & Cleaner

*CELL GEL* is suitable for the removal of all types of printing inks, lacquers and adhesives from a wide range of equipment and surfaces. It is designed for difficult to access and stubborn to clean areas such as Anilox rollers and brushes, for restoring cells/equipment to their original depth and condition.

*CELL GEL* can be applied by brush, cloth or pad and worked well into the area with an Anilox brush or similar. After leaving to penetrate and loosen debris, wipe away and clean with water before allowing to dry. Repeat as necessary to remove final traces of pigment or resinous materials.

Caution: *CELL GEL* may attack and soften some plastic surfaces – check on an inconspicuous part before full use. Washing with water ceases any action.

High boiling point solvent blend, slow evaporating; giving longer contact time for increased cleansing activity

Thickened formulation, so clings to all parts of the machinery and equipment – no run off and improved performance

Dissolves most solvent and water based printing inks, lacquers and adhesives - versatile

Slow drying, low odour, low vapour production – so lower Health & Safety risks and improved working conditions

Water rinseable – shortens final drying times

The logo for Melpass, featuring a stylized red 'M' followed by the word 'elpass' in blue lowercase letters.
