

PRODUCT INFORMATION

T-Sil

Silicone Spray Aerosol - Polysiloxane Release Agent

T-SIL is invaluable in the printing industry where it is used to enable paper to slide freely over tables and machine surfaces; to prevent ink build-ups on equipment; and to prevent glues causing problems in bookbinding.

Spray directly on to the surface to be treated or spray *T-SIL* onto a cloth, and apply to the surface.

Reduces surface friction and static build-up.
Treated surfaces shed adhesives, inks, paint and resins.
Non-staining, non-toxic, odourless and colourless.
Imparts water-repellence to most surfaces.
Effective temperature range from -40°C to +260°C.

The logo for Melpass, featuring a stylized red 'M' followed by the word 'elpass' in blue lowercase letters.
