

PRODUCT INFORMATION

FISTS'R'Clean

Beaded Hand Paste For Heavy Duty Cleansing

FISTS'R'CLEAN uses the most modern blend of safe, non harmful ingredients currently available. It is suitable for the most arduous tasks and can be used in vehicle workshops, foundries, mines, quarries, print shops, etc. However, while *FISTS'R'CLEAN*'s formula has the ability to breakdown all oils and greases, it's subtle composition makes it ideal for more 'technical' cleaning situations such as the removal of modern printing inks.

Ideally using a wall mounted dispenser apply a small quantity to the hands and gently rub into the skin, allowing the polymer beads to agitate the soiling. Rinse off thoroughly. Re-apply if necessary for heavier duty cleaning.

It's new cleaning system – uses the very latest chemical developments without resorting to hazardous kerosene based products.

High polymer bead content – for the most dynamic scrubbing action.

Super rinse ability – *FISTS'R'CLEAN* rinses off hands more effectively than any other known hand cleaner with no greasy after film.

Hygienic – can be dispensed through most conventional equipment without the need for 'the hand in the tub'.

The logo for Melpass, featuring a stylized red 'M' followed by the word 'elpass' in blue lowercase letters.
